Re: 813 E. 15th Street, Plano, Texas 75074

Dear Eric

First Christian Church, all of the staff and members, are pleased with the beautiful new West Fellowship Hall and Office Suite which was created out of the old empty space adjacent to the church. Your assistance with the preliminary plans got us off on the right foot. Thank you.

The purpose of this letter, however, is to "go on record" with our appreciation for the fine work done by John Lacey. John suggested a number of things that we had not thought of and we would have regretted not incorporating into the building. He pays attention to detail and has a sharp eye for quality. He cares that the finished product is what will best serve the end user.

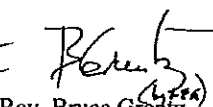

Time was of great importance, as I am sure it is in every post-disaster project. Having no offices or classrooms was a strain of staff and members. We know that John was planning and organizing the contractors in order to complete the facility in as short a time as possible. We truly appreciate all of his efforts in that area.

Equally important is John's personal character. He is respected as a good Christian individual as well as a project manager. He represents his church and GuideOne Taylor Ball equally well. We were pleased with his choice of subcontractors: there was never any question about appropriate language or behavior when in the presence of senior members, ladies, and children. That is not always true around construction sites and it is especially important to churches.

Thank you for assigning John to this project.

Sincerely,

Dr. Mike McConachie
Senior Pastor
